Application No.: 10/656,586

## LISTING OF CLAIMS

1. (original) An apparatus comprising:

a process chamber having a chamber wall;

a showerhead provided in said process chamber; and

a plurality of exterior fasteners extending through said chamber wall and into said

showerhead.

2. (original) The apparatus of claim 1 wherein each of said plurality of exterior fasteners

comprises a fastener head and a threaded shank extending from said fastener head, and wherein

said fastener head engages an exterior surface of said chamber wall.

3. (original) The apparatus of claim 1 further comprising a gas mix plate carried by said

chamber wall above said showerhead.

4. (original) The apparatus of claim 3 wherein each of said plurality of exterior fasteners

comprises a fastener head and a threaded shank extending from said fastener head, and wherein

said fastener head engages an exterior surface of said chamber wall.

5. (original) The apparatus of claim 1 further comprising a confine ring provided in said

process chamber beneath said showerhead.

6. (original) The apparatus of claim 5 wherein each of said plurality of exterior fasteners

Application No.: 10/656,586

comprises a fastener head and a threaded shank extending from said fastener head, and wherein said fastener head engages an exterior surface of said chamber wall,

- 7. (original) The apparatus of claim 5 further comprising a gas mix plate carried by said chamber wall above said showerhead.
- 8. (original) The apparatus of claim 7 wherein each of said plurality of exterior fasteners comprises a fastener head and a threaded shank extending from said fastener head, and wherein said fastener head engages an exterior surface of said chamber wall.
  - 9. (withdrawn) An apparatus comprising:

a process chamber having a chamber wall;

a showerhead provided in said process chamber;

a confine ring provided in said process chamber beneath said showerhead; and

a plurality of embedded fasteners extending through said confine ring and said showerhead and into said process chamber, with each of said plurality of embedded fasteners substantially embedded in said confine ring.

10. (withdrawn) The apparatus of claim 9 wherein each of said plurality of embedded fasteners comprises a fastener head and a threaded shank extending from said fastener head, and wherein said fastener head is substantially flush with said bottom surface of said confine ring.

Application No.: 10/656,586

11. (withdrawn) The apparatus of claim 9 wherein said process chamber comprises a gas

mix plate carried by said chamber wall above said showerhead and wherein said plurality of

embedded fasteners is threaded into said gas mix plate.

12. (withdrawn) The apparatus of claim 11 wherein each of said plurality of embedded

fasteners comprises a fastener head and a threaded shank extending from said fastener head, and

wherein said fastener head is substantially (lush with said bottom surface of said confine ring.

13. (withdrawn) A method of mounting a showerhead in a process chamber having a

chamber wall defining a chamber interior, comprising the steps of:

extending a plurality of fasteners into engagement with the showerhead and the process

chamber; and

structurally isolating said plurality of fasteners from the chamber interior.

14. (withdrawn) The method of claim 13 wherein said extending a plurality of fasteners

into engagement with the showerhead and the process chamber comprises the step of extending a

plurality of exterior fasteners inwardly through the chamber wall and into the showerhead.

15. (withdrawn) The method of claim 13 wherein each of said plurality of fasteners

comprises a fastener head and a threaded shank extending from said fastener head.

16. (withdrawn) The method of claim 15 wherein said extending a plurality of fasteners

into engagement with the showerhead and the process chamber comprises the step of extending a

plurality of exterior fasteners inwardly through the chamber wall and into the showerhead.

17. (withdrawn) The method of claim 13 wherein said extending a plurality of fasteners

into engagement with the showerhead and the process chamber comprises the step of extending a

plurality of embedded fasteners through the showerhead and threading said plurality of

embedded fasteners into the process chamber.

18. (withdrawn) The method of claim 17 wherein each of said plurality of fasteners

comprises a fastener head and a threaded shank extending from said fastener head.

19. (withdrawn) The method of claim 14 wherein said structurally isolating said plurality

of fasteners from the chamber interior comprises the step of abutting the showerhead against the

chamber wall.

20. (withdrawn) The method of claim 17 wherein said structurally isolating said plurality

of fasteners from the chamber interior comprises the step of embedding said plurality of

embedded fasteners in a confine ring disposed in the chamber interior beneath the showerhead.
